MINES PROSPECTS UTAHS GREATEST MINING PROSPECTORS INDUSTRY

PORPHYRY A SURPRISE

Copper Contents at Bingham Astenish Natives.

MOST INSTRUCTIVE LESSON

Utah Copper Company Is the Lucky Pessesser.

Superintendent Janney Releases Figures That Afford Conclusive of Success of Undertaking.

The avenue with which the new channel of ore in the Old Telegraph of Bingham has been cross-cut, said Superintendent Mayberry who came in from camp yesterday, has demonstrated the presence of no less than 76 feet remainder were dull and inactive the of copper, gold and silver bearing ore day closing on the following market: om camp yesterday, has demonstratbetween walls, while to demonstrate the extent of it along the strike drifting has now begun. The metallic contents of the ore, said the visitor, compare favorably with the best that has been encountered in the property, the face assays at intervals showing as much as 4 per cent copper with \$9.60 in gold and 4 ounces silver per ton, while the average for the entire crosscut affords as much as \$5 gold without reference to the other metals. Mayberry says that while it is not a new lode the channel is independent of any hitherto tapped and that there is certainly nothing to indicate other than that it continues to the surface over 200 feet above. Concerning the recent try-out of the tramway Super-Intendent Mayberry says the record of 850 tons was made in ten hours and that he is satisfied that it will respond with any tonnage for which the management of the smelter shall call on him in the future.

A very interesting condition is reported at the property of the Silver Shield Mining company, of which he is consulting engineer, while the camp throughout is making a record that will exceed all previous ones.

MR. CHISHOLM IN TOWN.

One of the Original Owners of the Centennial Eureka on a Visit.

Colonel O. P. Chigholm, one of the old guard by which the Centennial Eureka of Tintic was added to the bonanzas of Utah, came down from his home in Montana yesterday to confer with Manager Tibbits of the Ohio Copper Company of Bingham, who made the report upon which a group of six gold-bearing locations on Ward's Peak, Madison county, Montana, are being transferred to a Scotch syndicate headed by none other than Andrew Urquhart of Helena. For the reduction of its gold-bearing ores which occur in ledges varying from three to twelve feet in width, gaid Colonel Chisholm, the purchasing syndicate will, next spring, construct a cyanide plant of large capacity. These proper-ties that have been made the foundation for the Moline Gold Mining company are but fifteen miles distant from the Mayflower group on Tobacco Root range, which is operated by Senator Clark and which is annually productive of a fortune.

About a year ago Mr. Chisholm sold

the Yellow Jacket group in Montana to an eastern crowd from which another payment has just been received. The group has to its credit a number of most sensational performances, the management at an interval producing in three hours a ton of ore for which it received \$4860. colonel Chisholm's visit is being

made most pleasant by a circle of old

DRIFTING IN ORE.

Ohio Copper Company Making Fine Record in Its New Work.

The management of the Ohio Copper company is now drifting on the level from the main winze below the tunnel in a body of copper-bearing ore which is exposed on top, sides and bottom and which, in metallic contents, compares favorably with the best in camp, says Mr. Bettles, who is serv-ing it in an advisory way. Meanwhile, the winze has been dropped down in ore to a depth of 145 feet while every-thing encourages the feeling that the mill will be ready to go into commis-sion by January 15th.

Over the Copper Belt.

William Bayly, Jr., of the Copper Belt railway, by which the mines of Bingham are afforded an all-rail outlet to the smelters of the valley, was in from camp again yesterday, much pleased with the patronage that the producers of the copper camp are be-

DESTROY THE CAUSE.

You Cannot Cure Dandruff Without Destroying the Cause of It.

Many people wash their scalps Saturday night or Sunday to try to keep the dandruff down for the week, but on Monday night the scalp has begun to itch, and Tuesday morning will find a good supply of dandruff when the hair is brushed. There is but one real scientific way of curing that dandruff; and that is to kill the germ that causes it, and falling hair, and that is Newbro's Herpicide. It is an entirely new discovery and the only hair preparation that is based on the new scientific principle. In addition Herpicide is a very refreshing hair dressing for regular tollet use. Sold by leading druggists. Send 19e, in stamps for sample to The Herpicide Co., Detroit, Mich.

stowing upon the line. At present there is being forwarded over its rails nearly 600 tons of ore daily, with this to be increased as soon as the Boston Congets its equipment on the ground, while a number of others are about ready to fall into line.

THE DAY ON 'CHANGE.

The Investor Buying Cautiously and at Long Intervals Only.

The day on the mining exchange closed with the sale of 33,005 shares of stock, for \$10,172.62, and with the market again provokingly weak. Daly-Judge, which had headed the advancing column the previous day, was hammered down to \$3.25 in the trading although a shade better was held out to it at the close, while Daly West, whose transfer books will close on the January dividends tomorrow. January dividends tomorrow, changed hands at \$25.65, and Daly at \$2.62½. Con. Mercur, which did some sprinting the previous afternoon, was marked down to 61½ cents, while New York was advanced to 11½ cents, with Nail-driver recording a single transfer at 62½ cents. Tetro, notwithstanding the steady producing of the way weak at steady production of ore, was weak at 285-8 cents, as was May Day at 71/2 cents, while Ingot was dumped into the pit at 2 cents, with Carisa in good de-mand around 11% cents. Century, whose shareholders were thumbing another dividend, found a refuge for al

CAMPS OF DEEP CREEK.

A Salt Lake Crowd Reports Result of Its Observations at the Utah.

A letter from J. M. Hamilton, who with three others, left Salt Lake City on Christmas day on a pilgrimage through the camps of Deep Creek, says of the Utah mine at Fish Springs that it is in better condition than at any period in its history, and that in a short time the force is to be increased from time the force is to be increased from thirty-five to filty. Superintendent Crisman assures Mr. Hamilton and his friends that "with sufficient hoisting power there would be no trouble in profitably working 100 miners. That this may be done," writes Mr. Hamilton, "the company will no doubt reaching its plant this evabling the man adjust its plant, this crabling the man agement to produce thrice the ton-nage now coming to the valley smelters." Mr. Hamilton and his friends who are developing the mining proper-ties in Deep Creek are headed for home,

and promise an instructive story on their arrival. Tonopah-Belcher Strike.

A report from Arthur Hulson of the Tonopah-Belcher Mining conpany's properties out of Tonopah, Nev., assures local interests of another strike in that property, and that he will report in town in a few days with another consignment of orc. The new ore body, which, it is said, shows an average valuation of 254.90 per ton in silver and lead, was encountered after drifting 140 feet on the 150-foot level,

QUARTERLY DIVIDENDS.

Montana-Tonopah Will Pass 'Round \$60,000 Every Three Months.

A report comes from the West that the management of the Montana-Tonopah company, whose mines are located at Tonopah, Nev., has notified the directors that it is prepared to provide the means with which to pay quarterly dividends of 6 cents a share, or \$99,000, until such time as the railway is completed, when it will do even better. Meanwhile the usual amount of high-grade ore is coming to the furnaces of the American Smelting and Refining company in this valley, while Manager Knox is hourly adding to the wealth under ground.

COMPROMISED THE SUIT.

An Action Involving a \$5,000,000 Proposition Settled Out of Court.

Stockton, Cal., Jan. 7 - A big mining cuit, involving the Royal mine at Hodson, estimated to be worth nearly \$5.000,-69), has been compromised, the plaintiff, expending so much on development J. H. Brotherton, formerly of London but and in the equipment of the undertakow of Denver, securing everything he ing is to be reimbursed.

now of Denver, securing everything he asked for. The facts in the case, as stated in the complaint, are as follows:

J. H. Brotherion, the plaintiff, and John C. Kenp Van Ee, the latter being the present superintendent of the Royal mine, were promoters in London from 1886 to 1886. During that time they acquired considerable mining property in cluding the Royal mine, located at Hodson, in Calaveras county. Brotherton was taken into the proposition, owning a half-interest. Brotherton did not think he was being treated fairly, so he brought suit for an accounting and for his share of the profits of the mine. The case was to have come up for trial in the Superior court of Calaveras county at San Andre, but a compromise was affected and the sult has been dismissed by stipulation.

Owing to a strike of the miners of the Royal, the mine has been closed down for some time and the surfkers have been temporarily enjoined from interfering with the mine of the non-union men who have taken the places of the sirfkers. The taking out of ore has been resumed, however, and forty stamps are now operating.

HALIFAX TO SINK

HALIFAX TO SINK.

What Utah Talent Is Doing to Demonstrate Tonopah's Merits.

The Tonopah Bonanza says of the Hall-

fax group being developed by Messrs. Keith and Kearns that the water has been pumped out of the 600 level and a station is being cut at which the large pump will be placed. There is now forty feet of water remaining in the shaft, which will be pumped out during the coming week, and three saifts will be put to work sinking. It is the intention to sink to the 1600-foot mark before crosscutting. The custom mill just erected by Messrs. M. P. Boss and Alex J. McCone, and now in process of priming, promises not only to be a big success, but to successfully solve the question of treating all those Tonopah eres which are responsive to milling. This mill is being installed at the instance of the original leasers, who, curiously enough, were the men who gave the camp its initiation into the ranks of the producers. This is a noteworthy comment on the energy and push of those intropid pioneers. water remaining in the shaft, which will

trepld pioneers. Ore and Bullion.

In the ore and bullion market during the day the settlements amounted to \$2,000, McCornick & Co reporting them as they follow: American bullion, \$37,360; gold bullion, \$11,390; gold, silver, lead and copper ores, \$33,260.

In the metal market sliver ruled at 57% cents an ounce, lead at 21.50 per 150 pounds, and casting copper at 11½ cents a pound.

THE TRIBUNE NEWS STANDS STRIKE AT THE DIXIE

High-Grade Ore Appears on Footwall.

FINE COPPER PERCENTAGES

First Appearance of Ore on Herizen.

Value of the Property Materially Advanced by Disclosure-Smelter Turning Out Usual Bullion.

Reports from St. George indicate a strike in the Dixie group of mines out of that southern metropolis which is perhaps the most important which has been made there since the present administration was inaugurated. According to advices that come through most reliable channels the management has succeeded in finding the ore on the footwall which has now been reached with cross-cuts from the 450 and 625foot levels, the ore maintaining an average of about 14 per cent copper. It is the first time in the history of the property, which has been an exceptional one for many years, that ore has been uncovered on the footwall, and with it exposed on two levels and at points over 200 feet distant-measured on the dip of the ledge-constituted an asset that is equal to any other in th property. At present the usual amount of ore is going to the smelter under the direction of Manager Doolittle, while improvements that are being made in methods for the transportstion of the ores should add materially to the earnings.

OLD TELEGRAPH STRIKE.

New Channel Shows Width of 76 Feet, With Big Gold Values.

The new tunnel which is to afford the permanent outlet for the ores of the Utah Copper company at Bingham has been driven into the group a distance of 310 feet, the breast at that station affording a vertical depth of nearly 400 feet, said Superintendent Janney yesterday, the territory which is now being explored responding with percentages in copper and values in gold and silver that have surprised even the management. The rock, said Mr. Janney, is maintaining an average, indeed, around 3 per cent of the red metal with characteristic contents in gold and silver and with a volume of this that is almost exhaustless, it is easy to see how the company which is The average will astonish not a few of those who have characterized the properties of

several days, the guest of his nephew, Henry Miles. Mr. Butterfield was one of the original owners of the Old Hick-ory group of mines now among the as-sets of the Majestic Mining company, and which in its early days was among the most productive properties in the region. He operated it successfully for a number of years after which it was sold by him to a Canadian com-pany for which he became the manager. Mr. Butterfield, who cleared alongside of Joe Farren for several years, finally sought a home in California where he was prominently iden-tified with the development of the mines and finally gravitated to New York. In Beaver county he had for leighbors the lamented Allan G. Campbell. Matthew Cullen, Dennis and Patrick Ryan and many others whose names are prominent in the story of Utah mining.

AN ORDINANCE.

An ordinance levying a tax and for the assessment of property on the east side of Third East street between Second South and Third South streets, in Sidewalk District No. 22, for the construction of a sidewalk of a sidewalk

of a sidewalk.

Be it ordained by the City Council of Salt Lake City. Utah:

Section 1: That the City Council does hereby levy the tax and provide for the assessment upon the property hereinefter described abutting on the cast side of Third East street between Second South and Third South streets, in Sidewalk District No. 22 rict No. 22. This tax is levied to defray the ex-

trict No. 22

This tax is levied to defray the expense of constructing a sidewalk upon said portion of said street opposite the property hereinafter described to be especially affected and benefited by said improvement, and it is hereby adjudged, determined and established that the same will be especially benefited thereby to the full amount of the tax hereby levied, and said parcels of land are hereby assessed at an equal and uniform rate in accordance with the linear foot frontange upon said portion of said street fronting upon and to a depth of twenty-five (25) feet back therefrom, and the tax hereby levied and to be assessed upon said parcels of land is eight hundred and seventy-one and 20-100 (\$871.20) dollars, or one and \$2-100 (\$1.22) dollars per front or linear foot, and the treasurer is hereby authorized and empowered to assess in accordance with the provisions of this ordinance for the purpose herein mentioned, all of lots 4 and 5, block 49, plat "R," Sait Lake City survey, as the same are shown upon the official plats of said city to a depth of twenty-five (25) feet back from said street. Sec. 2. This ordinance shall take effect upon approvat.

Sec 2. This ordinance shan take upon approval.

Passed by the City Council of Salt Lake City. Utah. December 14, 1963, and referred to the Mayor for his approval.

J. O. NYSTROM, City Recorder.

Approved this 16th day of December, 1962. EZRA THOMPSON, Mayor.

State of Utah, City and County of Salt Lake—88.

I. J. O. Nystrom, City Recorder of Salt Lake City, Ulah, do hereby certify that he above and foregoing is a full, true nd correct copy of an ordinance enti-led, "An ordinance levying a tax and for he assessment of property on the east ide of Third East street between Second louds and Third South streets it Side. South and Third South streets, in Side-walk District No. 22, for the construction of a sidewalk," passed by the City Coun-cill of Salt Lake City Utah. December 14, 1963, and approved by the Mayor De-cember 16, 1962, as appears of record in my office.

my office.

In witness whereof I have hereunto set my hand and affixed the corporate seal of said city this 16th day of December, J. O. NYSTROM. City Recorder. [Seal.]

Bill No. 137. Sidewalk Exension No. 52. NOTICE TO WATER USERS.

State Engineer's Office, Salt Lake City, Utah, Dec. 13, 1903.

Notice is hereby given that the Continental Mines and Smelting corporation, by Henry M. Crowther, its manager, whose postoffice address is Salt Lake City, Utah, has made application in accordance with the requirements of chapter 199 of the Session Laws of Utah, 1903, to appropriate one (I) second foot of the water of Little Cottonwood creek, situated in Salt Lake county, Utah, to be diverted by means of an intake box and pipe at a point immediately above the junction of the north fork of said Little Cottonwood creek, from which place the water will be conducted in a pipe for a distance of about 2500 feet, and there to be used from January 1st to December 31st, inclusive, of each year for general domestic purposes, including the extinguishment of fires, at the Continental-Alta mine, situated above the town of Alta, in Little Cottonwood mining district. It is intended that only the lesser part of said water will be consumed, and that the greater part of it will be returned to the natural channel of said Little Cottonwood creek at a point where said north fork connects with the main stream.

All protests against the granting of said application, stating the reasons therefor, must be made in writing and filed in this office after thirty (50) days and before sixty (50) days from the date hereof.

A. F. DOREMUS, State Engineer.
